- \$595 SAT/ACT Prep program (25% Off)
- Total Savings to LCS Family= \$250

How the Sylvan SAT/ACT College Prep Program Works:

- Starts with a full-length practice SAT/ACT test. This test is just like the real SAT/ACT test and is used to diagnose individual strengths and weaknesses in order to identify the individual's opportunities for improving their score. We diagnose weaknesses in 2 main areas:
 - 1) Areas where the test is not being taken in the most efficient and effective way from a strategy standpoint.
 - 2) Specific patterns and trends as to what the student is missing most frequently (examples: fractions, ratios, exponents, etc.).
- This diagnostic practice test then allows us to have a more customized and individualized approach to improving the score. Rather than a preplanned or preformed prep program that is made for millions of students across the country, Sylvan's approach is totally catered to the individual student, which is what makes it effective.
- Our diagnostic approach is the most efficient way to improve a score because it only focuses on the areas that the student is missing. It thereby allows you to confidently know that what you are studying will truly benefit you, rather than taking a blind study approach and hoping it works.
- The program includes 4 more practice tests in order to monitor and ensure improvements are happening before taking the real test.
- We monitor the student on an ongoing basis, keeping them accountable to the work that needs to be done in order to optimize the results.
- No expiration date. The student can have access to the Sylvan College Prep Program for as long as they need it from the time of purchase.
- The average improvement is 100-150 points on SAT and 1-3 points on ACT.
- Recommended to start the SAT/ACT prep process at least 6 months prior to the date of the actual test. The earlier you get started, the less stressful the college application process will be.
